### CISO 360 Congress

*Barcelona - 5-7 July 2017*

*"The conference was full of expert speakers. You wouldn't want to miss any of them. Particularly on the Boardroom/ Roundtable discussion (last day), it is like a strategic planning and facing the board of directors, but with less pressure. Excellent!"*

*"The CISO 360 conference brought together a collection world leading experienced security leaders who shared their knowledge and experience with their peers in an open and collaborative manner under Chatham house rules. This was complimented with case studies from selected top tier partners and organisations to provoke further debate and discussion during the talks or later during 1x1 networking conversations. The presentations; case studies; and strategy sessions were practical and relevant because they were born out real world security challenges faced by Global CISO's across multiple sectors. I found the open knowledge sharing; networking; and presentations were very valuable to either validate existing approaches or provoke fresh ideas by getting a different perspective."*
