Security Threat Horizon: What threat trends over the short-to-long-term will challenge our security defences and how can we prepare now?

Thursday 4 November 2021 | 17:30-21:30

Lotus Room | The Beaumont | Mayfair London

Sponsored by

SECURONIX™

About the Venue

Superbly located on a quiet Mayfair square, The Beaumont recaptures the spirit of old-world luxury, aesthetic and values, firmly underpinned by 21st century advances in technology and ease. It is privately-owned and independently-run. Panelled in cherry and walnut wood, the private dining Lotus Room is fully furnished with leather chairs, a grand board table, vintage lighting and a bespoke Art Deco carpet. CISO 360 Dinner guests will be treated to a menu created by the chefs of The Colony Grill, The Beaumont's much-lauded restaurant.

Security Threat Horizon: What threat trends over the short-to-long-term will challenge our security defences and how can we prepare now?

Horizon scanning can be a good technique for people to challenge assumptions and review multiple ways that events could unfurl, in order to increase the resilience and reliability of their organisations. This is not about trying to predict the future, but instead explores what the future might look like to understand uncertainties better and to analyse whether the organisation is adequately prepared for potential opportunities and threats. How can we are currently gathering, sharing, forecasting and communicating security threat horizon trends and how we can ensure that we are prepared for threats.

This Dinner Roundtable is chaired by **Paul Hopkins, Global Head of Cyber Strategy, Architecture and Secure by Design at Vodafone**, hosted by Pulse Conferences and sponsored by Securonix.

This is part of a series of roundtable discussions are specifically designed for CISOs working within organisations with 5,000+ employees to benchmark experiences and the unique challenges that CISOs in Large Enterprises face.

As part of the evening discussion, Security Evangelist at **Securonix, Oliver Rochford** will share his top 3 predictions on the security horizon, including forecasts for living off the land techniques, future of behavioural automation and why ML Malware will relativize as a threat.

Questions that emerge will surely include:

- What scanning models are we using?
- How can we spot potential causes for uncertainty?
- What can we do to prepare now to increase our resilience to survive threats?
- How can we exploit opportunities on the security threat horizon to strengthen the business?
- What tools can we use to ensure that we are prepared for threats on the horizon?

Conducted under The Chatham House Rule, the discussions, **Clive Room**, a Director at **Pulse Conferences** will be your Master of Ceremonies for the evening. There is no cost to attend. Places around the table are limited and confirmations will be done on a ‘first to confirm’ basis.

We hope that you can join fellow CISOs for what promises to be a evening of fascinating discussion, a top culinary experience and fantastic company!

Yours sincerely,
Team Pulse

Approximate timings

- 17:30-18:30 Guests arrive and welcome drinks
- 18:30-21:00 Discussion while dinner is served
- 21:00-21:30 Conclusions, goodbyes and guests depart

“Pulse consistently deliver high quality events supporting the needs of senior IT and risk management leaders”
Group IT Security Manager, RES Group

“Excellent evening, fine food, congenial company, informative, all round a fantastic evening and time well spent”
Head of Information Security Risk, Royal Mail Group

“Discussions were lively, interesting and engaging. Having the opportunity to meet industry peers, alongside excellent hospitality of Pulse and the sponsor, made the evening an all-round success.”
Head of Information Security, Condé Nast International

Insights by:

Oliver Rochford, Security Evangelist, Securonix
Oliver has worked in cybersecurity as a penetration tester, consultant, researcher, and industry analyst for over 20 years. Interviewed, cited, and quoted by media, think tanks, and academia, he has written for Security Week, CSO Online, and Dark Reading. While working at Gartner, he co-named the Security Orchestration, Automation and Response (SOAR) market, and worked on the SIEM Magic Quadrant. At Securonix, Oliver works with users on security operations and threat management topics.

Chaired by:

Paul Hopkins, Global Head of Cyber Strategy, Architecture and Secure by Design, Vodafone
Paul leads a talented team of security architects and consultants designing and securing Vodafone’s systems, products and services. Embedding security across Cloud, IoT, Mobile, Office and Fixed networks, with a diverse range of people, technologies and business applications every day brings new insight and a different perspective. Prior to this Paul was Technical Director for CGI’s UK Cyber Security Practice, and a Principal Security Architect, working on a number of security transformation programmes. Paul has lead a team providing managed security services and incident response, worked as a penetration tester, been a software developer and leader, and started as security researcher in 1992.
