Practical Ways to Modernise Security

Tuesday 28 September 2021

Discussion: 14:00-17:30 | Networking Reception: 17:30-19:00
{10-11} Carlton House Terrace & Gardens | London

About IBM Security

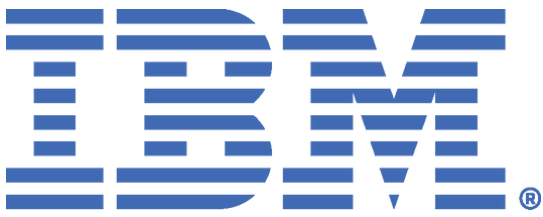

IBM Security partners with you to protect your business with an advanced and integrated portfolio of enterprise security products and services infused with AI that helps you thrive in the face of uncertainty. By aligning your security strategy to your business; integrating solutions that protect your digital users, assets, and data; and deploying technology to manage your defenses, we enable you to mitigate your risk and grow with a modern open approach that supports today's hybrid multi cloud environments.

For more information, please check www.ibm.com/uk-en/security, follow @IBMSecurity on Twitter or visit www.securityintelligence.com/.

Practical Ways to Modernise Security

You are invited to attend this inspiring half-day CISO 360 Fireside Chat and Roundtable: Practical Ways to Modernise Security hosted the afternoon of Tuesday, 28 September at {10-11} Carlton House Terrace overlooking St James’s Park and the Mall in London.

Sponsored by IBM and hosted by Pulse Conferences, we hope you can join CISO peers and senior strategists for 360-degree benchmarking on practical ways to modernise security.

- 1. Share **practical ways to modernise security** in an exclusive fireside chat! Martin Borrett, Distinguished Engineer and CTO IBM Security EMEA will be joined by our top panel of CISOs
- 2. Benchmark security approaches with CISO peers on **reactive vs proactive security**: what works, what doesn’t and why; What metrics get the best reaction from the Board; How are we doing proactive threat hunting, continuous monitoring and investigation of threats?
- 3. Explore with CISO peers what organisations are embracing and adopting the idea of a **Security Platform**, what this looks like in practice and what are the challenge areas
- 4. Join inspirational CISOs and senior IBM strategists in roundtable discussions to discuss how **Open Security** can support an approach where standards and applications work better together; How CISOs are navigating all the buzz words to find true value and avoid misconceptions with SIEM, SOAR and how we can adapt cybersecurity maturity models with automation
- 5. **Network face-to-face with peers** in the safe, prestigious and central setting of {10-11} Carlton House Terrace and Gardens

Register online today to confirm your place! There is no cost to attend this discussion for CISOs and senior cybersecurity practitioners.

Places around the table are limited and confirmations will be done on a ‘first to confirm’ basis.

We look forward to meeting you in September for what promises to be a fascinating discussion, including afternoon tea on arrival and a networking reception in the Waterloo Place East Gardens.

Yours sincerely,
Team Pulse

Co-Led by

Martin Borrett
Distinguished Engineer, CTO IBM Security EMEA, IBM

Martin advises at the most senior level in clients on policy, business, technical and architectural issues associated with security. Martin is co-author of the IBM Redbooks “Introducing the IBM Security Framework and IBM Security Blueprint to Realize Business-Driven Security” and “Understanding SOA Security”. He is Chairman of the European IBM Security Board of Advisors, represents IBM at GFCE and the Industry Advisory Board of LORCA, the London Office for Rapid Cybersecurity Advancement, is a Fellow of the British Computer Society, a Chartered Engineer (CEng) and member of the IET. Martin has a passion for sailing and has represented Great Britain; he is also a keen tennis player.

Graham Edwards
Head of Cyber Security Yorkshire Water

A successful senior Chief Information Security Officer and Operational Risk Director with a proven track record in multi-cultural and multi-national organisations, Graham bridges technical and business disciplines and communicates at all levels. He has extensive knowledge of Information Security, Cyber Security, Physical Security, BCDR, Operational Risk, Crisis Management, Data Protection, Financial Crime and Compliance. The first 16 years of Graham’s career were spent in the Diplomatic Service engaged in technical security for the Foreign and Commonwealth Office. He then moved to the financial services sector where he has held senior security posts with Abbey National, Standard Chartered, Barclays, RBS, HBOS and ING. Through these roles he has developed a holistic approach to risk management and security, holding responsibility for information risk, IT security, physical security, fraud, money laundering, business continuity planning, compliance, crisis management and intelligence. Graham also worked outside of the banking industry as the Group Head of Information Risk for Centrica. He then held the position of Director of Data Security at Nationwide Building Society before taking the role as Head of Information Security at Camelot Lottery Solutions. Graham is currently Interim Head of Cyber Security at Yorkshire Water. He has a master’s degree in Information Security from Royal Holloway.

Timings at a Glance

14:00-14:30
Guests arrive and afternoon tea is served (Music Room)

14:30-17:30 Fireside Chat and Roundtable Discussions (Council Room)

17:30-19:00
Networking reception (Waterloo Place East Gardens)

Health and Safety Measures

Your safety is our top priority. Please read about the measures we are taking for the CISO 360 Fireside Chat and Roundtable [here](#)

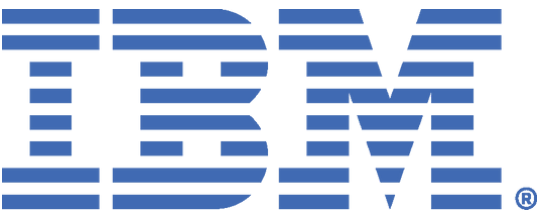

About the Venue {10-11} Carlton House Terrace

10-11 Carlton House Terrace,
London, SW1Y 5AH
www.10-11cht.com

Once the former residence of Prime Minister William Gladstone {10-11} Carlton House Terrace sits at the very heart of the capital, overlooking St James’s Park, Whitehall and the Mall. Superbly located just a short walk from Piccadilly, Charing Cross, and Embankment stations, the picturesque setting of St James’s gives the venue an air of distinction and the peaceful nature of Carlton House Terrace provides a rare reprieve from the hustle and bustle of the West End. The British Academy (housed within 10-11 Carlton House Terrace) is a forum for debate and engagement – a voice that champions the humanities and social sciences. Both through its convening power and an enhanced role as a funder of research, the Academy is developing programmes to address the great challenges of our time – nationally and internationally.

The CISO 360 Fireside Chat and Roundtable will be hosted in the Council Room, a grand space, with impressive paintings on the walls, on loan from the National Portrait Gallery.

Bright and airy with high ceilings and well-ventilated rooms that look out onto wrap around balconies, we have chosen this modern venue that is steeped in history with safety in mind and in keeping with a sense of the occasion. Afternoon tea will be served on arrival in the adjoining Music Room. The networking reception will be hosted outside directly across the road in the Waterloo Place East Gardens.

Agenda

14:00 – 14:30 Guest Arrivals and Afternoon Tea (Music Room)

14:30 – 14:40 Introductions (Council Room)
Master of Ceremonies: Clive Room, Director, Pulse Conferences
Co-Chairpersons: Graham Edwards, Head of Cyber Security, Yorkshire Water
Martin Borrett, Distinguished Engineer and CTO IBM Security EMEA, IBM

14:40 – 15:20 Fireside Chat – Practical Ways to Modernise Security
Led by: Graham Edwards, Head of Cyber Security, Yorkshire Water
With: Martin Borrett, Distinguished Engineer and CTO IBM Security EMEA, IBM
Stephen Khan, CISO Office, Department of Health and Social Care

Explore reactive vs proactive approaches to security and hear how CISOs are adapting cybersecurity maturity models by automating workflows, integrating Open Security and adopting security platforms that produce better, faster outcomes. Practical ways to free up the CISO to focus on business strategic priorities!

- Reactive vs Proactive · Which approach do you take and why?
- Are you doing proactive threat hunting, continuous monitoring and investigation of threats? What works, what doesn't
- How do I communicate cybersecurity with the Board?
- What metric for threat management and incident response gets the best reaction when I share it?
- Do organisations with AI and automation and incident response planning have lower threat?
- How can Open Security support an approach where standards and applications work better together?
- Are organisations embracing and adopting the idea of a Security Platform? What does it look like, what are the benefits and challenges?
- How are we navigating all the buzz words to find true value and avoid misconceptions? SIEM, SOAR
- How are we developing and adapting cybersecurity maturity models with automation to optimise operational efficiency?

15:20 – 15:40 Coffee Break and Networking

15:40 – 17:00 Roundtable Discussions – Sharing and Comparing Practical Ways to Modernise Security
Working in smaller groups, take a deeper look at some of the key topics from the fireside chat are discussed across a total of four tables. Each table will be co-led by a fellow CISO and a senior strategist from IBM. You will rotate tables once after 40 minutes, giving you the opportunity to contribute to both topic discussions. Note-takers on each of the tables will capture the main points, non-attributed to reflect that the entire event is held under The Chatham House Rule. This output will be combined to form a practical take-away for distribution post-event.

Roundtable 1 - Security Approach: Reactive vs Proactive

- Which approach do you take and why?
- Is it because of skills, too many tools/vendors, attacker sophistication, volume of noise/attacks etc.
- Are you doing proactive threat hunting, continuous monitoring and investigation of threats?
- What works, what doesn't – sharing collective learnings
- How do I communicate cybersecurity with the Board?
- What metric for threat management and incident response gets the best reaction when I share it?

Table 1 Co-Hosted by:
Martin Borrett, Distinguished Engineer and CTO IBM Security EMEA, IBM
Julia Harris, Information Security Compliance and Assurance Director, Flight Centre Travel Group

Table 2 Co-Hosted by:
Stephen Khan, CISO Office, Department of Health and Social Care
Michael Hoddy, Strategic Alliance Director, IBM Security

Roundtable 2 - Practical Automation Strategies: Open Security and Security Platforms
Sharing proven strategies to develop and adapt cybersecurity maturity models. How are we automating workflows by integrating Open Security and adopting security platforms that produce better, faster outcomes? Practical ways to free up the CISO to focus on business strategic priorities and tasks.

- How can Open Security support an approach where standards and applications work better together?
- Are organisations embracing and adopting the idea of a Security Platform?
- What does it look like and what are the challenges?
- How can CISOs benefit?
- How are we navigating all the buzz words to find true value and avoid misconceptions? SIEM, SOAR
- Developing and adapting cybersecurity maturity models with automation
- How are we optimising operational efficiency by automating repetitive tasks?

Table 3 Co-Hosted by:
Graham Edwards, Head of Cyber Security, Yorkshire Water
Dino Stavrou, Technical Sales Leader, IBM Security

Table 4 Co-Hosted by:
Lee Harris, MSSP & Cloud Pak for Security Leader, IBM Security EMEA, IBM Security
Carole Embling, Information Security Manager – Awareness and Behaviour Change, Metro Bank

17:00 – 17:25 Summary of Key Points from Each Table
Wrap up from each table (5 minutes per table) on the key approaches and challenges that emerged from the discussions.
By Table Co-Hosts

17:25 – 17:30 Closing statements
Co-Chairpersons: Graham Edwards, Head of Cyber Security, Yorkshire Water
Martin Borrett, Distinguished Engineer and CTO IBM Security EMEA, IBM
Master of Ceremonies: Clive Room, Director, Pulse Conferences

17:30 – 19:00 Networking Reception (Waterloo Place East Gardens)
Please join the peers for drinks and bowl food across the road in the gardens!
