CISO 360

Dinner Roundtable

Hosted by

COMPLIMENTARY GUEST INVITATION
BENCHMARK AND NETWORK WITH PEERS

Adapting and simplifying a roadmap to build an identity security strategy for the cloud. What does a zero trust approach to identity security look like?

Tuesday 26 October 2021 | 17:30-21:30

The Garden Room | The Goring Hotel

Belgravia | London

Kindly Sponsored by

About the Venue

The CISO 360 dinner and discussion will be hosted at The Goring Hotel in the private Garden Room, which has its own conservatory area with a sliding wall of glass, leading out to gardens where pre-dinner drinks will be served on arrival.

The Goring was built by Jeremy Goring's great-grandfather Otto in 1910 and has been lovingly run by the Goring family since its inception. A visionary, Otto Goring saw great promise in a plot of land situated at the Buckingham Palace end of what today is known as Beeston Place. After removing a public house and several cottages, the path was laid clear for the last grand hotel of the Edwardian era – The Goring. Opened on the 2nd March 1910 this historic hotel was finally complete, along with en-suite facilities and central heating in each and every bedroom – widely believed to be a world first. Today, The Goring remains a favourite address and hidden gem for anyone seeking out that impeccably English luxury hotel in the centre of London.

Adapting and simplifying a roadmap to build an identity security strategy for the cloud. What does a zero trust approach to identity security look like?

Cloud adoption is at an all-time high and predictions point towards the majority of future failures being a result of improper management of identities, access and privileges.

Sponsored by SailPoint, hosted by Pulse Conferences, you are invited to attend this roundtable discussion in the inspiring and private dining setting of The Goring Hotel to hear what CISO peers are doing to simplify identity management projects to protect against cyber threats in a diverse workforce and that target digital identities.

The core objective of the discussion is to connect peers for an energetic debate on the practical approaches, realities, challenge areas, and what metrics get the best response for identity security. Questions that are certain to be covered include:

- Has your digital pivot accelerated an identity centric security programme?
- How has the speed of your organisation's cloud adoption caught you off guard? What is next?
- What are resilience strategies and tools that are working, not working
- How can we build an effective identity centric security strategy without re-inventing the wheel?
- What are practical ways to adapt and simplify an identity security roadmap? How can we find the balance between agility and security with IAM?
- How can we get better at controlling privilege change?
- What would be the business impact if an organisation could effortlessly manage the access of its users?
- What strategies are peers using for trust and access with other senior leaders?
- What do customer first identity and access management strategies look like? What new technologies are improving the world of IAM?
- What does a zero trust approach to identity security look like?

Conducted under The Chatham House Rule, the discussions will be co-chaired by a leading CISO alongside a senior strategist from SailPoint. Clive Room, a Director at Pulse Conferences will be your Master of Ceremonies for the evening.

If you can accept, kindly register online to confirm your place at the table. There is no cost to attend. Places around the table are limited and confirmations will be done on a 'first to confirm' basis.

Many thanks for kindly considering this invitation. We hope that you can join fellow CISOs for what promises to be a evening of fascinating discussion, a top culinary experience and great company!

We look forward to hearing from you soonest.

Yours sincerely,

Team Pulse

Approximate timings

17:30-18:30 Guests arrive and welcome drinks outside in the Garden

18:30-21:00 Discussion while dinner is served

21:00-21:30 Conclusions, goodbyes and guests depart

About SailPoint

SailPoint is the leader in identity security for the cloud enterprise. We're committed to protecting businesses from the inherent risk that comes with providing technology access across today's diverse and remote workforce. Our identity security solutions secure and enable thousands of companies worldwide, giving our customers unmatched visibility into the entirety of their digital workforce, and ensuring that each worker has the right access to do their job, no more, no less. With SailPoint at the foundation of their business, our customers can provision access with confidence, protect business assets at scale and ensure compliance with certainty. Stay up-to-date on SailPoint by following on Twitter and LinkedIn and by subscribing to the SailPoint blog.
