

ITALY

The (ISC)² Italian Chapter provides thought leadership and guidance for security professionals in Italy. As the only official (ISC)² course provider in Italy (CISSP and, in the near future, CSSLP certifications), the Chapter hosts official trainings for Security Leaders as well as networking opportunities and knowledge sharing. To fulfill its mission, it organizes several initiatives as:

- webinar on a monthly or fortnight base;
- a complete security awareness program for schools (about one hour for kids and up to 2 hours for college students. Up to now this program covered about 58.000 students, teachers and parents;
- conferences. The next will be in the picturesque village of Faenza next September 20;
- whitepaper as the last one on ransomware that you may find at

and many other activities including partnership with other organization or association to cooperate to advance our mutual interests to increase the likelihood of each achieving its mission and to amplify our reach in accordance with (ISC)² directives.

We will wait for you in Faenza (RA), Italy, next September 20 (for further information please stay tuned on <https://www.isc2chapter-italy.it/>)

## COLLABORATIVE BUSINESS CONTINUITY DISASTER RECOVERY CRISIS MANAGEMENT

**How to cope with the new global disorder. Lessons learned and how to build a new harmony**

*Collaborative* because we want to stress the fact that we are going beyond the simple convergence. Instead, we need to act as a cohesive and closely coordinated body to address today's multiple challenges.

The world in which we are living, in just three years, has completely mutated. The new *"global disorder"* becomes therefore the starting point to draw some *lessons learned*. Finally, *harmony* because, now more than ever, security professionals need to operate in harmony as in an orchestra.

**SAVE THE DATE**

**SEPTEMBER 20<sup>ND</sup> 2022**  
**FAENZA**

ASIS HEADQUARTER - Via San Giovanni Bosco, 1
