Community, Peer Benchmarking, Development

Pulse Conferences are dedicated to inspiring, connecting, innovating, and engaging with professionals through quality live programmes. To create a trusted space and sense of belonging. Our aim is to provide opportunities to connect the right people at the right time, in the right environment. We shape our events by working with and for the C-Level executives and practitioners who deliver cybersecurity, corporate resilience, investigations, intelligence, and anti-fraud strategies across the globe.

- **Collaboration** – CISOs need someone to talk to who understand their unique challenges. Share problems, get new perspectives!
- **Connection** – Build relationships with peers and luminaries. Have fun and expand your pool of professionals
- **Learning** - Leaders are "lifelong learners, learning lifelong" and have enough humility to know that they can still learn something new from others despite what they've accomplished. CISOs are forward-looking thinkers who make valuable predictions for their organisations by hearing from peers and luminaries, inside and outside their industry who are at different stages of transformation.
- **Inspiration** – Discover and apply new ideas and new ways to solve problems. Someone in the room at a Pulse event has the answer to your biggest challenge!

• **Trust** - One of the key things about exchanging ideas or sharing the unvarnished truth is trust. Our executives have almost an unspoken rule about not sharing outside the "walls" of the community. Leaders can share the good, the bad, and the ugly experiences without worrying that someone will share the details later.
