Tuesday 8 November 2022  
13:00-15:30  
Grand Hôtel – Carl Larsson Rummet  
Stockholm

Hosted by

Take 2.5 hours out of your day over lunch time to benchmark and network with fellow CISO, DevOps, Architects, App Sec and Security Engineers

*You'll be home in good time - with a box of **kvällsmat** to share with the family!*

Join Pulse and peers for the Nordics CISO-DevOps Lunch Exchange in Stockholm, one of the final dates in what has been a successful 9-City tour across Europe!

Hosted by Pulse Conferences and kindly sponsored by Contrast Security, the networking lunches will be co-led by fellow guests – CISO, Architect, App Sec, DevOps, Transformation practitioners from the region – and by Larry Maccherone. Prior to joining Contrast Security, Larry was the Distinguished Engineer, DevSecOps Transformation at Comcast, where he built and scaled their transformation programme. Larry will happily share his practical experiences and learnings with you in these stunning settings over an informal lunch where all guests are encouraged to input.

Get to know peers with similar interests in securing digital transformation to compare what works and what doesn't with other organisations.

Talking Points

- What are our most pressing questions and biggest challenges when dealing with DevOps/Security?
- What are we doing already and what new things are we considering?
- How are we collaborating internally to improve agile and secure initiatives?

All discussion is conducted under The Chatham House Rule on non-attribution as to who said what but you can still use the lesson. Pulse Conferences will be your Master of Ceremonies for the evening. There is no cost to attend.

We hope that you can join peers for what promises to be a fascinating afternoon discussion with great cuisine and company.

Yours sincerely,  
Team Pulse

Timings

13:00-13:15 Guests arrive and arrival drink

13:15-15:15 Discussion with peers over lunch

15:15-15:30 Conclusions, goodbyes and guests depart with a box of **kvällsmat** to take home and share with your family!

About Contrast Security

Contrast Security enables developers to speed application development cycles while writing more accurate, secure code. Contrast embeds security instrumentation within software that eliminates code halts and the need for expensive security experts by automatically identifying vulnerabilities and verifying their fixes while developers write code. In doing so, Contrast observes the routes of an application while it is running, thereby exposing all of the different points of entry into the application. Delivering highly accurate and always-on protection, Contrast also eliminates time-consuming and frustrating false positives that create alert fatigue as well as false negatives that can pose serious risk to applications in runtime and moreover incur significant development time remediating. Finally, as the industry's only DevOps-native AppSec Platform, Contrast delivers comprehensive coverage from development to production, dramatically reducing the number of AppSec toolsets developers need to manage. More information can be found at [www.contrastsecurity.com](http://www.contrastsecurity.com) or by following Contrast on Twitter at @ContrastSec.

Larry Maccherone, DevSecOps Transformation, Contrast Security

Larry Maccherone is a thought leader on DevSecOps, Agile, and Analytics. At Comcast, Larry launched and scaled the DevSecOps Transformation program over five years. In his DevSecOps Transformation role at Contrast, he's now looking to apply what he learned to guide organizations with a framework for safely empowering development teams to take ownership of the security of their products. Larry was a founding Director at Carnegie Mellon's CyLab, researching cybersecurity and software engineering. While there, he co-led the launch of the DHS-funded Build-Security-In initiative. Larry has also served as Principal Investigator for the NSA's Code Assessment Methodology Project which wrote the book on how to evaluate application security tools, and received the Department of Energy's Los Alamos National Labs Fellow award. Looking at Larry Maccherone's career, you might think he can't figure out what he wants to be when he grows up – Serial entrepreneur? Agile transformation coach? Open-source developer? Data scientist? Dev[Sec]Ops thought leader? However, the underlying theme is that Larry has constantly been striving to create the highest performing software engineering teams. At Comcast, Larry built and scaled the DevSecOps Transformation program over five years, and he's now looking to apply what he learned doing that to help all Contrast customers and prospects. Larry hails from Raleigh, NC, where his wife and four daughters make sure there is never a dull moment!
