Cybersecurity Strategies to Build Trust and Resilience

FINCRIME | INNOVATION | AI | METAVERSE | IOT | CLOUD | DATA

Created and hosted by Pulse Conferences, the **3rd CISO 360 Americas** brings together CISOs and international cybersecurity leaders from the Americas for truly immersive discussions. As today's CISOs move towards an uncertain future and unknown cyberspace, be privy to threat horizon updates and a toolkit focused agenda designed around CISO priorities.

A problem shared is a problem halved!

Compare and share how fellow CISOs are leading teams and driving their businesses forward, as well as to learn from technical tactics and visions for the future. Hear insights on the challenges we all face, with an attack surface being created through digital transformation, complex supply chains as well as insider threats. How we can build collective resilience and a culture of good cybersecurity governance to defend our organisations.

Hear journeys, predictions and game-changers that will span from geopolitics, supply chain, response and recovery, human security, culture, disinformation, threat horizon, mitigations and how might we tip the scales back in our favour.

Meet face to face with CISO peers from across the U.S. and from around the world to engage, learn and benchmark leadership strategies
