HOW CAN WE REDUCE CYBERSECURITY RISK EFFECTIVELY ACROSS THE ENTERPRISE AND IN A MEASURABLE WAY?

Welcome to **CISO 360 Risk Vision – Hong Kong**, part of the global thought-leadership roundtable series sponsored by Qualys and hosted by Pulse Conferences.

Greater collaboration and sharing are vital to stay ahead of and to reduce risk in the fast-paced digital landscape. We invite you to take a seat at the table for peer-to peer benchmarking, knowledge sharing and networking in an exclusive private fine-dining setting.

As CISOs, the challenge is real – we ask ourselves, is our organisation more secure today than it was yesterday? With the attack surface expanding, speed, volume, and consolidation are essential as we race against bad actors to fix vulnerabilities once detected. With a unified platform and a risk-based strategy we can show various stakeholders that security teams are doing a good job.

CISOs and cybersecurity practitioners are invited to take a seat at the table to partake in benchmarking and knowledge sharing with peers on risk reduction strategies, now and in the future.

Richard Seiersen, Chief Risk Technology Officer of Qualys will co-steer the conversation working alongside a prominent CISO from the region. Richard has over 10 years of experience as a CISO, having led and supported security strategy, operations, and governance across critical infrastructure and cloud native organizations - the perfect steer for the CISO 360 Risk Vision Roundtable.

GUESTS ARE ENCOURAGED TO ACTIVELY CONTRIBUTE TO THE DISCUSSION.

Gain fresh perspectives and draw from the experiences of your peer group, leading to valuable and actionable takeaways. Pulse Conferences will be your host for the evening while you enjoy a top culinary experience! .

TALKING POINTS

- How are we as CISOs communicating risk 'at speed' to the Board? Is there a solid understanding of cyber risk and how is this resonating with the Board?
- What approaches are we using to measure how we reduce cybersecurity risk effectively? What metric gets the best reaction when I share it?
- How is risk managed at the time of an incident? Who owns the risk?
- How are we balancing basic security hygiene with the need to embrace innovation in automation to improve ROI?
- As a collective group, what are our predictions on what risk reduction will look like in the next 5-10 years?

TIMINGS

5:30 PM - 6:30 PM
Guests arrive & welcome drinks
6:30 PM - 9 PM
Discussion over dinner
9 PM - 9:30 PM
Conclusions and Coffee

AS A CISO, WHY ATTEND?

- Led by with and for CISOs - hear real-world journeys and experience shared, what works, what doesn't
- Engage in an intimate and open setting – hosted under The Chatham House Rule of non-attribution
- **Richard Seiersen, Chief Risk Technology Officer of Qualys** – 10 years a CISO and accomplished Author – will share real-world journeys and practical and innovative approaches to quantifying and reducing security risk!
- Actionable takeaways and future-facing risk perspectives to enhance cybersecurity posture
- Forge connections to expand your professional network with CISO peers and specialists in Hong Kong
- Hosted in a 5-star private fine-dining setting in a prestigious, convenient and central venue

Seats are limited, we encourage you to secure your place around the table today.

Join today to be part of the **CISO 360 Risk Vision – Hong Kong!**

ABOUT THE VENUE

Room 501 Private Dining Room
Legacy House| Rosewood Hong Kong
5/F Rosewood Hong Kong Victoria Dockside
18 Salisbury Rd, Tsim Sha Tsui
Hong Kong

The Legacy House – one of the finer restaurants within the Rosewood hotels group – and towering above the Kowloon waterfront, in suite 501. The restaurant overlooks Victoria Harbour, offering stunning views as the dinner commences in the evening. This space offers private dining for dinner, as well as a soft furnishing area within the same space, for guests to attend to welcome drinks beforehand. The restaurant offers Cantonese cuisine and specialises in dishes from Guangdong, and frequents being listed in both the Michelin guide as well as the World's 50 best restaurants. Images of the main dining space (Room 501), as well as the tea lounge/drinks area are attached for reference, alongside the set menu options.

CO-STEERED BY A CISO FROM THE REGION AND:
RICHARD SEIERSEN, CHIEF RISK TECHNOLOGY OFFICER, QUALYS

As the Chief Risk Technology Officer at Qualys Richard helps customers and the broader security community measure, communicate, and eliminate risk. With over 10 years of experience as a CISO, he's led and supported security strategy, operations, and governance across critical infrastructure and cloud native organizations. Richard has published two books, "How To Measure Anything In Cybersecurity Risk" and "The Metrics Manifesto: Confronting Security With Data." Each provides practical and innovative approaches to quantifying and reducing security risk. His first book is the main curriculum at the US Dept of Defense (DoD) CISO program at Carnegie Mellon University and numerous other institutions of higher education.
