PULSE
CONFERENCES

Welcome to the **6th CISO + 2nd CSO 360 Americas!**
Peer benchmarking on the risks and opportunities facing
global businesses in 2026 & beyond.

Dear Colleague,

We are thrilled to invite you to actively participate in the **6th CISO 360 + 2nd CSO 360 Americas** Conferences hosted by Pulse Conferences at the landmark **Well& by Durst at OWTC - 64th Floor in Lower Manhattan New York, 11-12 February 2026.**

As geopolitical competition, technological advances, regional conflict, and economic fragmentation reshape how businesses operate, move goods, protect people, and sustain trust, **CISOs and Chief Security Officers** are tasked with enabling business continuity in increasingly challenging operating environments. From supply chain and insider risk, to safeguarding people, property, assets, reputation and information, resilience and collaboration are strategic imperatives. Our overall theme this year is therefore **balancing innovation and resilience - and readiness.**

CISO & CSO 360 Americas brings together senior leaders across cyber security, corporate security, intelligence, resilience, and the boardroom to tackle the real risk and opportunity landscape shaping global business in 2026. Over two days, we will compare strategies and tactics across **cyber, corporate security, intelligence, resilience, AI, geopolitics, and boards.**

Why participate?

- **Real-World Relevance - practical, non-political, and grounded in real operational decisions rather than theory:** Delegates learn directly from recent, high-impact incidents and experience. Local, regional, international perspectives to understand the bigger implications of what we're doing and to develop best practices.
- **Peer-level, off-the-record, Actionable Takeaways:** A trusted global community of security leaders. Each case study is linked to practical lessons in governance, communication, and technical controls.
- **Board Engagement:** Scenarios help CISOs and CSOs practice translating technical incidents into board-level decision intelligence.
- **CISO + CSO 360! Two conferences together but apart:** Run side-by-side over the two days. Distinct in focus yet intentionally connected to encourage cross-pollination between cyber, corporate security, resilience, intelligence, and investigations while respecting the depth and craft of each discipline.
- **Innovation spotlight & curated 1-2-1 meetings + Cultural evening networking** experiences.

Join us in New York City!

Warm regards,

CISO + CSO 360 Americas Team

Pulse Conferences

"One of the things I enjoy about a Pulse CISO 360 event is that you get a global view. You're bringing folks together from around the world to share and it helps us to understand the bigger implications of what we're doing and to develop best practices. Pulse gives us a bigger audience to see wider."

Sounil Yu, Co-Founder and CTO, Knostic

"We're here in New York and we're very happy with the format, the engagement and participants! Nice to get fist bumps when I came off the stage and a lot of folks coming up to speak to us afterwards. We did 1-2-1 meetings, which you might think is really aggressive but the way in which its all set up means that we were able to meet with many people over an hour and they then came to our table later."

Scott Hawk, VP Strategic Partnerships, Alcalvio

Co-Located Security Leadership

9:30 AM Arrivals and Coffee

9:55 AM Chairperson's Welcome

Michael Colao, Former CISO / CSO and Recently Chief Underwriter - Direct and Indirect Risks, AXA XL

10:00 AM **Fireside Chat: Trust and Security in the New Geopolitical Reality**

Edelman U.S. CEO Kirsty Graham and Emergent Risk International CEO Meredith Wilson will explore how collapsing trust and rising grievance are reshaping the operating environment for global business leaders. Drawing on Edelman's latest Trust Barometer and ERI's strategic intelligence estimate "Business in the Gray Zone," they will examine how blurred lines between competition and conflict are creating new security, geopolitical and reputational risks for companies. The keynote will offer perspective for CEOs and C-suite leaders on building trust, protecting assets, and making confident decisions amid intensifying geopolitical ambiguity and societal polarization.

With: Meredith Wilson, CEO, Founder, **Emergent Risk International** and **Kirsty Graham**, Chief Executive Officer, **Edelman U.S.**

10:30 AM **Innovation Spotlight: The Cyber Paradox: Balancing Resilience in the Era of Innovation**

David Drossman, Field CISO - FS, **Cloudflare**

10:55 AM **AI Spotlight: New Operating Models for the Age of AI (and OpenClaw)**

Cloud is not simply another person's computer. It's a different operating model. The same could be said about AI, but we don't fully understand this new operating model that AI tools like OpenClaw is forcing upon us. It will reshape teams and business processes more than we realize or are prepared for. This talk explores the foundations of this shift so that we can have greater clarity on how our organization needs to be resilient and adapt.

Sounil Yu, Co-Founder and Chief AI Officer, **Knostic**. Book Author, **The Cyber Defense Matrix**

11:20 AM **Power Panel: Quantum Ready, AI-Resilient: Balancing Innovation with Trust, Resilience, and Human Agency**

How organisations can move fast and prepare now to stay secure when the threat landscape is increasingly automated, interconnected, and opaque. · What are key predictions on the emerging risks shaping AI, Quantum, and Web3? Is Quantum an imminent risk? · Where do human judgement and agency remain essential in an increasingly machine-speed world?

· How can we support innovation that is ethical, resilient and trusted by customers, regulators, and boards?

1:00 PM **Live Demos: Shadow-Connected Technology Inside Organisations**

This live demo reveals shadow-connected technologies that often sit outside asset inventories and evade pen tests and red teams, yet remain connected to business-critical and revenue-generating systems. Using real-world examples, the session shows how unmanaged IoT, OT, and embedded technologies are discovered in practice, why they are difficult to detect, and how hidden connectivity creates cyber and operational risk. A practical look at a growing blind spot CISOs can no longer ignore.

Ken Munro, Founder and Partner, **Pen Test Partners and Security Writer**

1:25 PM **CISO-AI Call to Action Panel: How is AI Helping CISOs and CIOs to Secure at Scale? Leap or Lack of Faith?**

CISOs and specialists explore how AI is reshaping security programs. AI is no longer optional. Vote for each usage - is this a leap or lack of faith?

· AI - threat detection and Agentic SOC (defending against AI-powered attacks such as deepfakes, automated phishing)

· AI - data security

· AI - identity management insight

· AI agents - posture and situational awareness
