## Welcome to the 10th CISO 360 Global Congress - Lisbon 2026

This June, the CISO 360 community will gather in Lisbon for the tenth edition of the Global Congress marking a decade of trusted dialogue among security leaders. CISOs, senior cyber security practitioners and luminaries from across Europe and beyond will come together under the **Chatham House Rule** to examine the realities shaping the role today.

The threat landscape has been redrawn. AI is outpacing governance. Geopolitical fault lines are cracking open enterprise risk models. Regulation is tightening its grip. Boards are demanding fluency in a language that keeps changing. Resilience is now an imperative. The CISO role now sits at the intersection of innovation, trust, and business and national competitiveness. **This is why Lisbon matters.**

The focus remains on thoughtful exchange, peer insight, and the opportunity to step back from daily pressures to reflect with others carrying similar responsibilities. Ten years on, the purpose of CISO 360 remains simple: to provide a trusted space for security leaders to learn from one another.

The call is for CISO practitioner-led discussions, sector perspectives, and real-world case studies, alongside conversations that bridge cyber security with corporate security, resilience, geopolitical risk intelligence. **The focus is cyber.**

For our 10th anniversary edition, we are inviting CISOs, senior cybersecurity practitioners, and luminaries from across Europe and beyond - Portugal's national champions alongside peers from around Europe and further afield. Three days. No noise, just the kind of frank, practitioner-led conversations that only happens when the right people are in the right room.

### **This is not a celebration of longevity. It is a recognition of security leadership.**

To those who have been part of this journey from the beginning - you built this. We thank you.

To those joining us for the first time - this event was made for you. Welcome.

We look forward to meeting you in Lisbon.

Warm regards,  
CISO 360 Team  
Pulse Conferences

- **Real-World Relevance** - practical and grounded in real operational decisions.
- **Peer-level, off-the-record, Actionable Takeaways:** A trusted global community of security leaders.
- **Board Engagement:** Practice translating technical incidents into board-level decision intelligence.
- **Resilience speakers embedded from our CSO 360 events!** We encourage cross-pollination between cyber, corporate security, resilience, intelligence while respecting the craft of each discipline.
- **Innovation hub** - Option to meet 1-2-1 with innovation luminaries.
- **Dedicated evening schedule of cultural receptions and dinners** - Showcasing the stunning setting.

“One of the things I enjoy about a Pulse CISO 360 event is that you get a **global view**. You’re bringing folks together from around the world to share and it helps us to understand the bigger implications of what we’re doing and to develop best practices. Pulse gives us a bigger audience to see wider.”  
Sounil Yu, Co-Founder and CTO, Knostic

**Cyber Challenges During an Era of Conflict and AI**  
Senior Speaker, Host Nation -invited

**Case Story: Digital Sovereignty in the Age of AI: Energy, Infrastructure, and Autonomy**  
Jorge Pinto, Information Security Professional, Siemens (Portugal)

**Panel: Cross-Sector Cyber Resilience Design & Testing Coordinated Crisis Response**

While many organisations are strengthening cloud security and AI governance, far fewer Cyber practitioners from industry, government and academia are addressing the systemic question:

How would cities, states, critical infrastructure operators, and private enterprises coordinate in the event of simultaneous cyber-induced disruptions, such as extended power outages, supply chain interruptions, or water shortages? Against a backdrop of DORA, NIS2, and increasing geopolitical risk, Who leads? Who communicates? Who owns recovery orchestration?

With: Sybil VR Kleinmichel, Managing Director, Sycheck Systems (Germany)

**Agentic Ransomware, An Evolving Threat**

Gary R. Hayslip, Field CISO, Halcyon (USA)

**Case Story: Open Source, Open Risk: Securing Engineering Teams in the npm Era**

Paul Colnan, CISO, New Day (UK)

**NEW for 2026! Panels and Playbooks by Sector**

A global financial institution, an energy operator, a retail giant, and a pharma innovator face cybersecurity challenges that are deeply shaped by their operating models, regulatory obligations, technologies, and global footprint. Cross-sector lessons are valuable for the Panels and Playbooks unlocking a different kind of intelligence and benchmarking. A perfect evolution for the 10-year marker.

1. Financial Services & Insurance: Operational resilience

- AI usage in fraud, modelling, and automation
- Cloud, data, and identity modernisation
- DORA and global regulatory harmonisation
- Securing payments, APIs, and cross-border financial infrastructure
- Third Party Risk Management
- Data-rich environments and customer privacy

2. Critical National Infrastructure / Power / Energy: Cross Board Resilience & Cyber Geopolitics

- OT/ICS security and engineering alignment
- Resilience planning across borders
- Third-party and supply-chain vulnerabilities
- AI-driven threats to critical services

3. Retail & Consumer: Customer Trust and Anti-Fraud

Customer identity and trust

- Fraud, loss prevention and payment security
- Distributed operational models (stores, warehouses, e-commerce)
- Supply-chain and logistics resilience
- AI-enabled personalisation vs privacy risks

4. Manufacturing, Automotive & Industrial: IT/OT/IOT

- Managing cyber risk across global plants and vendors
- Resilient manufacturing in a volatile geopolitical environment
- Security of connected and autonomous vehicles
- Supply-chain and tier-1/2/3 dependencies
- Protecting operational technology and fleet systems
- Cross-border incident response and crisis coordination
- AI, automation, and safety/security interplay

5. Pharma & Life Sciences: IP and R&D Protection

- IP and R&D protection
- Securing clinical trials and research data ecosystems
- Manufacturing site resilience and global operations
- Third-party, CRO and supply-chain risk
- AI in discovery, diagnostics and regulatory environments

6. Technology Providers

- How can cybersecurity vendors provide trust and assurance
- Securing global cloud and platform architectures
- Software supply chain and SDLC/DevSecOps maturity
- AI-driven product security
- Zero trust and identity across large-scale environments
- Global customer trust, incident transparency, and response

We would love to hear any speakers, companies or countries you'd like to hear from - or priority topics you'd like to put forward. If you are interested in speaking, please let us know.

## VENUE INFORMATION

### A TIMELESS HISTORICAL OASIS OF ESTORIL, ONLY A 30-MINUTE DRIVE FROM LISBON CENTRE

Palácio Estoril  
R. Particular 2769-504 Estoril  
Lisbon | Portugal

On the sunlit Cascais coast, just outside Lisbon, the Palácio Estoril offers nearly a century of elegance, discretion and quiet significance. Estoril is no ordinary setting. Befittingly, during WWII, the hotel became a neutral crossroads for intelligence networks - with Allied agents based at the Palácio while rival operatives occupied nearby hotels. In 1968, James Bond stayed here during the filming of *On Her Majesty's Secret Service*, where reality and legend briefly converged.

A decade of practitioner-led trust deserves a venue defined by discretion, strategy and global perspective. A place where history was shaped quietly behind closed doors.

Ten years on, we gather somewhere worthy of the milestone 10th CISO 360 Global Congress.
